Eclipse 3500kg / 4100kg

Please note some images may show optional extras not included as part of the base specification.

Equi-Trek Eclipse

The Eclipse is built on a brand new and unregistered Mercedes-Benz chassis, with a CDI powerful diesel engine, which complies with the latest Euro 6 standards and gives effortless performance and outstanding economy.

This is further enhanced by the 9 speed fully automatic gearbox, giving a very smooth ride for both horses and passengers, thereby reducing stress levels on arrival at a competition. It also incorporates a hill start assist function.

The body is made from composite panels for long, low maintenance life.

The Eclipse has the added benefit of a tack/changing room that is totally separate from the horses. This incorporates two saddle racks, two bridle racks and two coat hooks. There is also additional storage over the cab.

Horse Area

- Full Height Bulkhead
